FOR IMMEDIATE RELEASE

CME Opportunity Offered at Annual Family Medicine Workshop

(COLUMBUS, Ohio)—Ohio Academy of Family Physicians (OAFP) has announced continuing medical education (CME) topics for its 2012 Family Medicine Workshop, scheduled for Saturday-Sunday, Jan. 14-15, and Jan. 28-29, 2012, at Crowne Plaza Hotel, Dublin, Ohio.

From case history analysis to interactive sessions with each instructor, the workshop will offer technical theory and current practice methods on the following topics:

- Rheumatology
- Bipolar Disorder
- OB/GYN
- Urology
- Renal
- Neurology
- Behavioral Medicine
- Metabolic/Endocrine

In addition, a three hour skin biopsy workshop will be offered on Sunday, Jan. 15 at no increased cost to attendees. The workshop is being offered as part of the practice-based services of the patient-centered medical home (PCMH) model.

Registration for the seminar is open to family physicians, primary care physicians and residents. Each two-day, weekend course costs \$195 for OAFP members, \$245 for other primary care physicians and \$100 for residents.

More information, including course schedules and an online registration form, is available at http://www.ohioafp.org/conferences_cme/conferences/workshop.php or by contacting Director of Events Erin Jech at 614.267.7867.

Since 1963, the Family Medicine Workshop has provided information on diagnostic techniques, advanced technical theory, current research, problem-solving methods and management techniques within the core content areas of family medicine. Each two-day, weekend course provides plenty of time for case discussion and interaction with the faculty.

Application for CME credit has been filed with the American Academy of Family Physicians (AAFP) and American Osteopathic Association (AOA). Determination of credit is pending; based upon credit granted in previous years, we anticipate approval of 23 prescribed credits over both weekends.

The Ohio Academy of Family Physicians is a statewide professional association with more than 4,100 members, including practicing physicians, family medicine residents and medical students. The scope of family medicine encompasses all ages, both sexes and every disease entity. Family physicians provide comprehensive, continuing care to all members of the family.
