

TABLE 5 Mean % change in Total Cholesterol and LDL-Cholesterol measures after switching to Simvastatin 20 mg	
	Crestor 10 mg to Simvastatin 20 mg (n = 15)
Women	9
Men	6
Age (mean ± SD) (yrs)	63 (8)
Age (range)	53-78
Total Cholesterol BL (mean ± SD) (mg/dL)	166 (36)
Total Cholesterol % change	-14.0**
p Value* pre-switch vs post-switch	0.122
LDL-Cholesterol BL (mean ± SD) (mg/dL)	83 (31)
LDL-C % change	-27.2**
p Value* pre-switch vs post-switch	0.146
% patients who reached LDL-C <70 mg/dL	20.0
% patients who reached LDL-C <100 mg/dL	53.3
Follow-up time (mean ± SD) (weeks)	24 (14)
* p values <0.05 are statistically significant	
** negative percentages are indicative of an increase (calculations based on initial minus final)
